III CATEGORY

FABRIC

**DURA FLAME KNITWEAR** - Aramid. Aramid fibre knitted fabric particularly comfortable. 510 gsm.  
Resistance to convective heat: **thermal rise time of 24°C of more than 10 seconds (performance level B2)**. The flame-retardant properties remain unaltered throughout the life of the garment.

SECTORS

Civil Protection, Firefighters, Voluntary work

USE

Undergarment that must only be worn with other suitable external head protection PPE (fire helmets). The hood, when worn with the protective clothing, respiratory protective device and helmet, offers protection to areas of the neck and head exposed to flame and heat. Due to the shape of the face opening and the nature of the materials used, the hood is adaptable to any respiratory device. However, it is necessary to check compatibility before use. It is the user's responsibility to choose the right type of clothing to match the head, helmet and face mask recommended by the manufacturer. The standard only applies to situations where protective clothing (UNI EN 469), respiratory protective devices (UNI EN 136 and UNI EN 137) and helmets (UNI EN 443) are also worn. Uses other than those mentioned above are excluded.

**CERTIFICATE** CE 0891210039-00-00 issued by Centro Tessile Cotoniero e Abbigliamento (NB 0624) on 21 January 2021 (expiry date: January 2026)
