

## VERISHIELD™ 100 SERIES PASSIVE EARMUFFS

Superior hearing protection in a lightweight design. Optimum comfort even over long periods of use makes them solutions users will want to wear.

### Features

- **Large dimension range:** Comfortably fits a wide range of head sizes. 17% more adjustable than earlier versions.
- **Wide cup opening:** Ideal for workers with larger ears, or who wear hearing aids. Opening area of the cup increased by 16% over earlier versions.
- **Lightweight cushioned headband:** Steel-wire construction with padded headband and precision micro adjustments designed for just the right fit around the ear.
- **Memory foam ear cushions:** New unique memory foam that combines denser and softer foam than previous models, for greater comfort and attenuation. Reduces squeezing pressure on the head and enhances comfort.

### Robust construction

- Steel wire framework
- ABS molded with internal baffle design for lighter weight, patent pending
- An oil-resistant cup surface to withstand oily, heavy-work environments and frequent cleaning

### Air Flow Control Technology

Featuring a baseplate chamber and high-tech non-woven layer, Honeywell's Air Flow Control technology controls how sound reaches the ear, ensuring optimum noise attenuation across all frequencies.

VeriShield™  
100 Series

### PPE Integration

Easy to use and integrate with Honeywell hard hats and face shields. Can be assembled to a hard hat in approximately 7 seconds.

### Attenuation Ratings

The attenuation level of each style is marked on the earmuff cup, for quick and easy on-site identification of the level of hearing protection provided.
