

MSA V-TEC™ 3 m PFL (Personal Fall Limiter)

Suitable for multiple applications, the 3 m PFL is designed specifically for environments where close anchorage is available.

Compact and Versatile

The MSA V-TEC PFL is the most compact & lightweight self-retracting lanyard ever developed using multiple spring radial energy-absorbing technology. This new design eliminates the need for an external energy-absorber outside of the housing making it the smallest personal fall limiter on the market.

Reliable and Reassuring

MSA's Lifecycle Warranty means users can work at height with confidence that the PFL will continue to provide safety when it matters most. The product offers fall arrest and restraint for users 60 to 140 kg including tools.

MSA PFL

The world's first self-retracting lifeline with multiple spring radial energy-absorbing technology

- Integral energy absorber
- Requires zero recalibration or adjustment
- The energy absorber is completely sealed from external contaminants

Free range of motion

A fully rotating attachment point for complete flexibility – both 360° and 180°

Precision engineering

A structurally reinforced pawl mechanism

Highly durable

A polycarbonate case houses the SRL, and its transparency allows for easy visual inspection of critical internal components

Superior materials

Components manufactured from high-grade stainless steel and engineered plastics
