

DISPOSABLE PRODUCTS / FLAT FILTERING FACEPIECES

SERIE BLS 700

ONE SIZE FITS ALL

Features

- 01 3-PANEL FLAT DESIGN**
The filtering facepiece adapts to different types of faces with different sizes and shapes, is comfortable to wear and easy to store when not in use.
- 02 FIT**
The large surface guarantees less breathing resistance and an excellent fit.
- 03 HYGIENIC**
The single hygienic package protects the filtering facepiece from any contamination before use, allowing it to be stored in a practical way and distributed in the work environment.
- 04 AVAILABLE WITH EXHALATION VALVE**
Low respiratory resistance exhalation valve, which allows hot humid exhaled air to escape more easily and ensures high comfort for the user, making the filtering facepiece suitable for hot humid work environments.
- 05 INTERNAL NOSE CLIP**
The nose clip, placed internally between the layers of filtering material, adapts optimally to the profile of the nose and eyes, ensuring good visibility and maximum compatibility with glasses.

*** FFP1 models available upon request**
